Admission Management Website Project

About Project

The Admission Management Website is a modern, digital platform designed to completely transform the traditional student admission process. It streamlines the workflow by enabling online application submission, document upload, and real-time status tracking for applicants. Notifications keep students updated throughout their journey. For administrators, the website allows quick application verification, shortlisting of candidates, and efficient seat management. By digitizing admissions, the system reduces paperwork, minimizes errors, lowers manual workload, and greatly improves experience for both applicants and admins.

Tech stack: HTML, CSS with a colorful, systematic design.

01

Key Features for Applicants

- Online application submission
- Easy document uploads
- Admission status tracking
- Real-time notifications

03

- Application verification
- Candidate shortlisting
- Seat allocation management

Key Features for Administrators

Objectives

- Make admissions faster, paperless, and error-free
- Reduce manual workload
- Improve applicant experience

Technology Stack

HTML and CSS

Focused on colorful and systematic UI design

07

Conclusion

This Admission Management Website streamlines and digitizes the entire admissions process, ensuring efficiency, reliability, and a positive experience for both applicants and administrators.
